EXECUTIVE GUESTS TESTIMONIALS

Thanks for a very interactive and engaging evening. I was humbled by the invitation and service. Thank you for the excellent hospitality and great service from the pick up to the cocktail and dinner.

I think it was a great mix of different stakeholders in the ICT or IoT ecosystem. I think there were consistent themes about how lots of organizations are trying to develop strategies to capture the value and opportunity of the IoT ecosystem. It was a pleasure to be there and share our journey and thoughts but also importantly to learn and listen to different perspectives from wise industry colleagues. I think these are also great opportunities to network and find business synergies and potential partnerships and collaborations.

**Head of IP, Cloud & Core for Region Sub Saharan Africa
Ericsson (South Africa)**

It was a good open debate with insight shared all around.

**Group Technology Director
Dimension Data (South Africa)**

Thank you. The event was awesome. Well organized and structured.

**Global Head Infrastructure Architecture
SASOL**

Great event. Thanks for inviting me.

**Head of IT Africa
Novartis South Africa**

Thanks for the invite... I found it very informative but more importantly provided a platform for collaboration on the topic. I liked the open, interactive forum.

**Vice President - Partner Business, Global Operations
Schneider Electric (South Africa)**

Many thanks for the invite. Enjoyed the format of the event and opportunity to network. Only suggestion would be to split the main presentation across 2 or 3 different presentations to create a bit of depth on the topic.

EXECUTIVE GUESTS TESTIMONIALS

It was a great opportunity to meet stakeholders and potential partners. IoT as we have heard is a new paradigm and we must think partnerships differently as well. It is not about 1:1 or 1:n. It is about n:m relationships that we have to build and jointly drive sustainable business.

Thank You for the opportunity! I have learned a lot tonight.

Innovation Lead, COO Area

SAP South Africa

Firstly, I would like to thank you so much for the invite to the Executive Dinner. I had an awesome and enlightening session. It was very interesting how IoT was simplified and realized that we have always been working on Internet of Things.

I took away a few things however one that stands out it the “you have to work with what you have, and start identifying the pattern/outliers”. it was really great to network with people from different organizations’ and realize that we are all in the same path.

CEO: FNB Forex

Rand Merchant Bank / First National Bank

It was an absolute pleasure. Thank you very much!

CIO & General Manager, Information Management and Systems

Transnet National Ports Authority

The event was a most pleasant and appreciated experience. Probably the most valuable aspect was the networking meet and greet interaction beforehand.

Insights from Dell were welcome and well presented. The Internet of Things is a relatively nebulous concept (in my opinion) and holds within it many and varied applications which companies can operationalize and monetize.

Senior Network Rollout Planning Specialist

Cell C

The event was one of the much better events I’ve attended -> the spirit of the event i.e. collaborative as opposed to ‘covert pitching’ was I believe appreciated by everyone...

CTO

CherryOlive

It was a lovely event – very interesting to see the different industries.
