EXCLUSIVE EXECUTIVE DINNER BY INVITATION ONLY

UNDERSTAND THE RISK: Securing ERP Applications during DIGITAL TRANSFORMATION

DATE & LOCATION

DC Metro Area

October 24, 2018

You are cordially invited to discuss emerging trends, challenges, and market issues with fellow C-Level decision-makers at SWS' exclusive, executive dinner.

For many organizations, digital transformations and cloud migrations are a detailed outline of business and operational plans to integrate, prioritize and fully utilize digital technologies available. While this plan has significant cost and productivity benefits to the organization, security is often a second priority or not in the scope of the project. Without properly implementing security from the start in these projects, organizations face costly delays or outages due to vulnerabilities or compliance failures. Beyond that, many organizations have not identified a plan for how they will migrate their most critical SAP applications and workloads in a secure way, putting their crown jewels at risk. As you plan for the future, you must ensure protection of the ERP applications that run your business.

WE WILL DISCUSS:

- ▶ How to align internal teams to incorporate security from the start
- ▶ How to make security an enabler instead of a roadblock during complex projects
- ▶ How to automate security processes and simplify reporting
- ▶ Proactive ways to engage senior executives in projects with reporting
